Course Code: MAX4336GS

Course Title: Maximo Application Suite - Manage: Automation Scripting

Description:

In this course, you will learn about automation scripting in Maximo, including how automation scripts can be used to extend functionality using code written in Python or JavaScript. This includes learning about launch points, variables and Maximo business objects in Maximo and how to use them and write scripts and run them with different launch points.

Along with a combination of procedural information and demonstrations, this course also has hands-on lab exercises using a Red Hat OpenShift Maximo Manage environment for you to try out.

Objectives:

After completing this course, you should be able to:

- Learn about Automation Scripting application in Maximo.
- Discuss the benefits of Automation Scripting.
- Understand different Launch points.
- Understand the scripting architecture.
- Learn about variables, bindings, array notations.
- Understand Maximo Business Objects
- Learn about logging and script creation.
- Understand and practice the usage of Automation Script with different launch points.

Duration:

5.6 Hrs

Topics:

- Get started
- Learn about Automation Scripting application, variables and business objects
- View the demos on creating and using automation scripts
- Practice what you have learned (hands-on-lab)
- Earn the badge
- Get your course certificate
- Complete the course survey

Audience:

Consultants, System Administrators, Support, Sales, Users
