Course Code: ODC8100GW

Course Title: Essentials of IBM DOORS Next

Description:

This course teaches analysts and engineers how to define, elaborate, organize, and manage textual and graical requirements and requirements-related information in IBM DOORS Next Generation v7. DOORS Next Generation is a key component of the IBM Engineering Lifecycle Management (ELM). The product provides requirements definition and management capabilities in a fully-integrated environment that can also include IBM Rational Team Concert for change and configuration management, and IBM® Rational Quality Manager for quality management.

Objectives:

Upon completion of this course the student will be able to:

- Define, elaborate, organize and manage requirements in DOORS Next
- View and work with requirements and other artifacts in a collaborative context
- Create and edit requirements documents and other artifacts, including both textual and graical artifacts
- Create, manage, and view traceability relationships between requirements and other artifacts

Prerequisites:

No pre-requisites for this course.

Duration:

8 Hrs

Topics:

Unit 1 - Essentials of DOORS Next

Unit 2 - Organizing Requirements
